THE ARMCHAIR CRITIC

EVEN the longest record runs some time to an end and the keenest enthusiast is sometimes too lazy to put on another. Then is the time to pick up the latest book by Dr. Percy Scholes, "The Mirror of Music," which tells the story of 100 years of musical progress in England as reflected in the pages of the "Musical Times."

Not only is there instruction and amusement to be obtained by gazing into this mirror, there is also pictorial interest and delight in the shape of 118 plates with 450 pictures. With its comprehensive index, the book is a most valuable reference work besides being an instructive and entertaining narrative by the author of the "Oxford Companion to Music."

This is what the reviewer of this journal has to say about it

"These are the most maddeningly beguiling books ever printed, I think. Here is endless interest for the amateur and the professional, for the seeker of curiosities and the delving musicologist. You can get your money's worth from the 'Mirror' in instruction or in gay entertainment."

And in "Music and Letters" we read

"No doubt these two volumes could have been compressed into one; but that would have made them unwieldy for a bedside book—and we may be sure that musicians and music-lovers for many a long week to come will retire to rest with one or the other."

In two volumes—52s. 6d. net

And speaking of books, may we remind you that the following are once more available.

BEETHOVEN and his NINE SYMPHONIES

George Grove 18s. *net*

It is a remarkable tribute to Grove's insight into the works, and to his illuminating manner of writing, that this book remains a unique contribution to Beethoven literature, no less valued than when it first appeared. It is addressed to the amateur in the strict definition of the word. Grove's approach is above all that of the human commentator, rather than that of the professional analyst.

THE INTERPRETATION OF THE MUSIC OF THE 17th and 18th CENTURIES

Arnold Dolmetsch 18s. *net*

Probably at no time in the present century has there been a greater interest in the authentic performance of music of the older periods. The lifelong research and the practical application thereof carried out by Arnold Dolmetsch has undoubtedly contributed in large degree to this wide interest. Chapters deal with Tempo, Rhythm, Ornamentation, Figured Basses, Position and Fingering, and Musical Instruments of the Period.

THE SOURCES OF KEYBOARD MUSIC IN ENGLAND

Charles van den Borren 18s. *net*

The author is a distinguished Belgian musicologist and the present volume represents one of his most noted achievements: it is in fact a standard European work of musical scholarship and one which is of vital interest to all students of keyboard music of the 16th and early 17th centuries. Originally published in England in 1915, this book remains the only thorough study of its type, illuminating a most important branch of English and European music.
